6. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

7. Claims 1-7 are rejected under 35 U.S.C. 102(b) based upon a public use or sale of the invention. Tow (hereinafter “Tow”) US Patent no. 5,761,654.

As to claim 1, Cheng discloses a method for specifying SQL, which enables the use of join condition in specifying the SQL statement. In particular, Cheng discloses a method for rewritten a structure query language (SQL) statement in order to prevent processing of a join between two tables (DT1 and DT2) (col.3, lines 1-5; col.4, lines 30-48; col.5, lines 32-60). Tow discloses the claimed “determining in the SQL statement a unique identifier to a row of the master table” a SELECT statement, which is well known Structured query language (SQL) can be used in connection with other data-access languages, wherein data access statement in question specifies (1) a plurality of tables and (2) a plurality of join condition, wherein each join condition specifies a unique identifier (primary key) to a row of the master table defining relationship between tables (col.4, lines 41-48; col.7, lines 13-24); “equating the unique identifier to an identifier to related rows of the detail table using the join condition” using the join condition, the detail table A that has a foreign key match with a given primary key in the table B (col.6, lines 55-65); “producing a revised SQL statement that only refers to the detail table using the identifier to the at least one row of the detail table” (col.7, lines 27-56; col.9, lines 32-35); and “processing the revised SQL statement”(col.9, lines 56-58).

As to claim 2, Tow discloses the claimed “wherein the unique identifier to a row of the matter table is indexed” (col.6, lines 47-48).

As to claim 3, Tow discloses the claimed “wherein the unique identifier to a row of the matter table is a primary key” (col.4, lines 47-48).

As to claim 4, Cheng discloses the claimed “wherein the unique identifier to a row of the detail table is a foreign key” (col.4, lines 49-50).

As to claim 5, Cheng discloses the claimed “wherein the join condition is an equality between a column of the master table and a column of the detail table” (col.6, lines 53-65; col.7, lines 1-11).

As to claim 6, Tow discloses a system performed by a computer for executing program of instructions (col.4, lines 36-38) to perform the steps of claim 1.
